PRO STOCK® GLOVES

Pro Stock® patterns used by the pros. The best ball glove materials out there. Glove craftsmen devoted to hand crafting the best gloves in the game. It's no surprise that big leaguers choose Wilson® to get them through a 162-game season. The same patterns, materials and craftsmanship go into every Wilson Pro Stock glove whether it's made for play on the game's biggest stage or your local diamonds. For the pros. By the pros.

SPIN CONTROL[®]

TECHNOLOGY

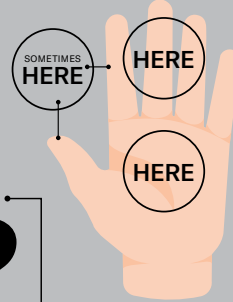

A **PATENTED** surface texture in our iconic Pro Stock[®] Leather designed to increase friction between the ball and your glove.

IT'S THE SAME PRO STOCK LEATHER YOU KNOW & LOVE IN A WILSON GLOVE ...

WITH DIMPLED TEXTURE ADDED TO THE PALM, FINGERS AND OCCASIONALLY THE WEB.

IN ADDITION TO OUR ON-FIELD WORK WITH BALLPLAYERS, WE'VE COLLABORATED WITH OUR PRO STOCK[®] LEATHER TANNERY AND AERODYNAMICS EXPERTS TO CREATE A2000[®] AND A2K[®] GLOVES THAT HELP PLAYERS CONTROL THE BALL WHILE MAKING PLAYS FASTER AND MORE CONSISTENTLY THAN EVER BEFORE.

WHAT DOES IT ALL MEAN?

Spin Control[®] Technology is designed to help you corral the ball and cleanly transfer it to your throwing hand so you can deliver it to your target with speed and precision.

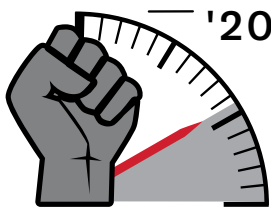

WHAT MAKES THE SUPERSKIN[™]

SO SUPER?

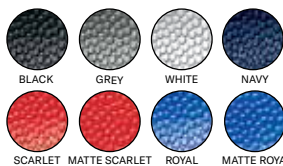

SuperSkin[™] is a carefully tested and refined microfiber material, perfected to deliver ultimate durability at the lightest weight possible. It repels moisture to keep your glove from getting bogged down by the weight of rain or wet grass. For years, other manufacturers have tried to create their own version of SuperSkin[™] using ballistic nylon, molded materials and more — only to come up short time after time.

TIME TESTED

Since the 1990s, countless pros have sworn by their SuperSkin[™] gloves. Craig Counsell, who played 16 seasons in the Major Leagues, is just one example. Aso built him one of the first SuperSkin[™] gloves in 1999, and he used it until his retirement in 2011. "Craig Counsell loved the glove so much," Aso said.

WILSON BALL GLOVE MASTER CRAFTSMAN

SHIGEAKI ASO

If you love what you do, you'll never work a day in your life. Few individuals in the world embody that expression as much as Aso, who has dedicated his life to the game he loves.

THAT'S MY GOAL. I DON'T WANT A PLAYER TO THINK ABOUT THEIR GLOVE AT ALL. HIS SMILE IS MY SMILE. IF HE SMILES, I CAN SMILE.

- Shigeaki Aso

Wilson Baseball Master Craftsman Shigeaki Aso has revolutionized the game for generations of players. His initial impact on the highest level of the game came in 1986 when he visited pro camps for the first time. With his decades of industry experience working with hides and leather quality control, he immediately noticed how common infield patterns featured long pinky and thumb stalls that were cumbersome to players.

He gathered feedback from as many players as he could find. One year later, he returned with what is, to this day, the most popular Wilson pattern — the A2000® 1786. From there, Aso developed the A2000® 1787 and A2000® 1788, launching a legendary journey of creating ball gloves.

Aso's initial iconic glove patterns were just the first innovations to come from his relationships with players. Aso has put in countless hours with some of the best to ever set foot on the field. Those collaborative efforts continue to this day with elite talents like Mookie Betts, Tim Anderson and Clayton Kershaw.

Aso credits the still-present language barrier between himself and big leaguers for his detailed understanding of what players are looking for in their gloves.

"I'm not a very good English speaker, which is why I ask questions again and again to players," Aso said. "They explain very honestly what they want. If I spoke English better, would they explain things so well to me? But they make sure to explain everything well because that means they'll get a great glove."

These conversations lead to the constant evolution of Wilson ball gloves, from the groundbreaking development of SuperSkin™ to more recent designs like Flat Finger Binding and Fastpitch-specific patterns and features. All these innovations share one common goal — ensuring that a player never has to think about their glove. It serves as an extension of the athlete, not an accessory.

PURSUING PERFECTION

Wilson® Game Model gloves aren't just worn by professionals. They're designed by them. Wilson Ball Glove Master Craftsman Shigeaki Aso sits down with select Advisory Staff members — either in person or on a video call — to craft a Game Model glove designed specifically for their play.

Aso's relentless passion drives his pursuit of the perfect glove. He collaborates with players to receive detailed feedback and ensure each glove is built to work for the player's game. Every glove has unique features, from the laces to the webbing and even the materials used, culminating in an innovative line of Wilson Game Model gloves.

A2K[®]

THE LEGENDARY A2K

Meticulously engineered, the A2K[®] is unrivaled among ball gloves. No detail is too small to Wilson Master Craftsman Shigeaki Aso and the experts who designed the A2K[®] for elite players, using the most premium materials and innovative technologies available in modern ball gloves. Flawless Pro Stock[®] Select leather is sorted three times to remove blemishes or imperfections, and each A2K[®] features Double Palm Construction—a strategically placed layer of leather in the palm to stabilize and maintain the pocket. Rolled Dual Welting reinforces the glove's shape, and innovations like lightweight SuperSkin[™] and patented Spin Control Technology[™] offer extra advantages on the field.

1.

PRO STOCK[®] SELECT LEATHER:

Wilson craftsmen triple-sort Pro Stock[®] Select Leather hides for consistency and flawlessness, using only the top five percent of materials in A2K ball gloves. The result is an incomparable break-in and long-lasting shape.

2.

ROLLED DUAL WELTING[™]:

Strips of Pro Stock[®] Select Leather are skived thin and rolled to provide the glove's long-lasting shape.

3.

DOUBLE PALM CONSTRUCTION:

A thin, perfectly shaped piece of leather placed between the palm and interior liner generates maximum pocket stability.

4.

THREE TIMES MORE SHAPING:

Expert glove craftsmen spend three times longer pounding and shaping the A2K[®] by hand, helping reduce break-in time.

A2000®

THE PREMIER GLOVE

Since its introduction in 1957, the A2000® has evolved with the game year after year. Durable Pro Stock® leather offers a consistent feel and allows for a detailed break-in process. Comfort Pro Fit features a supple leather Comfort Sleeve in the wrist binding and a Pro Lux™ leather palm lining that forms to the player's hand over time, making the A2000 feel like an extension of the body. Flat Finger Binding allows players to comfortably take the field with a finger outside the glove for improved control, and the Bold Logo package is built to stand out. The A2000® lineup includes patterns with innovations like SuperSkin™, Spin Control® Technology and Pedroia Fit™, ensuring there is an option for every player.

1.

PRO STOCK® LEATHER:

Wilson's iconic Pro Stock® leather is preferred for its rugged durability and unmatched feel.

2.

COMFORT PRO FIT:

The Comfort Sleeve embedded in the wrist is paired with Pro Lux™ Leather lining, creating a rich, soft feel that molds to a player's hand over time.

3.

FLAT FINGER BINDING:

Flattened wrist binding allows players to comfortably take the field with a finger outside the glove, allowing for improved control.

4.

ROLLED DUAL WELTING:

Integrated into the interior of Wilson gloves, Rolled Dual Welting supports the leather to help a glove keep its shape over time.

SUPERSKIN[™]

Wilson SuperSkin[™], developed by Master Glove Craftsman Shigeaki Aso, is the ultimate utility player in Pro Stock[®] gloves. The microfiber material is moisture resistant, extremely durable and half the weight of leather, offering players extreme command over their gloves.

SUPERSKIN[™]:

Twice as strong as traditional Pro Stock[®] leather and only half the weight.

REPELS MOISTURE:

Resistant to moisture, SuperSkin[™] extends the lifespan of the glove and prevents it from getting bogged down by the weight of rain or wet grass.

STRATEGIC DESIGN:

Glove craftsmen strategically place Pro Stock[®] leather and SuperSkin[™] to benefit players. Superskin material on the back of the glove reduces overall glove weight and is easy to maintain.

SPIN CONTROL[®] TECHNOLOGY

Wilson gloves with Spin Control[®] Technology feature a patented surface texture in the same Pro Stock[®] leather that players know and love. This textured pattern can be found in the palm, web and other leather surfaces of the ball glove, helping to reduce the spin rate of the ball by generating friction on contact.

PATENTED SURFACE TEXTURE:
A patented surface texture is imprinted on Wilson's iconic Pro Stock[®] leather.

INCREASED FRICTION:
The dimpled surface texture is designed to increase friction between the ball and glove on contact, helping players to handle any hop and quickly transfer the ball to their throwing hand.

PRO CALIBER LEATHER:
Available on several A2000[®] models, Spin Control[®] Technology adds a patented surface texture to ball gloves crafted with premium materials.

A1000®

BROKEN IN & READY TO GO

Grab your glove and get right to work. The A1000® baseball glove is game ready from day one thanks to its supple yet sturdy Full Grain leather construction. This series gives rising stars the comfort of a pro caliber glove without the meticulous break in process. All components are produced with form-fitting Full Grain leather, resulting in a glove that's easy to control.

DOUBLE PALM CONSTRUCTION (FRONT SIDE):

A thin, perfectly shaped piece of leather placed between the palm liner and outer shell, giving you what matters most: maximum pocket stability.

FULL LEATHER CONSTRUCTION:

Leather shell, laces and palm liner. These ball gloves expertly break in and conform to your hand.

LOW PROFILE HEEL (FRONT SIDE):

Gives more flexibility, opens up the palm and pocket and makes it more forgiving on bad hops.

OUTLINED LOGO PACKAGE:

Outfitted with the new outline logo package, the Wilson A1000 ball gloves stand out on the diamond.

A500

FOR THE YOUNG SERIOUS PLAYER

For the game's youngest players, fit and feel are everything. The A500™ is the lightest all-leather glove in the game, and its youth-specific fit is designed for rising stars. Short, narrow finger stalls accommodate small hands, and the Quick-Fit Wrist elastic system adjusts to hug the wrist. Real leather laces improve durability, and Wilson's signature dual welting maintains the glove shape.

TOP GRAIN LEATHER:

All the feel without the weight.

REAL LEATHER LACES:

Tough and strong for maximum durability.

DOUBLE PALM CONSTRUCTION (FRONT SIDE):

A thin, perfectly shaped piece of leather placed between the palm liner and outer shell, giving you what matters most: maximum pocket stability.

A2000[®] FP

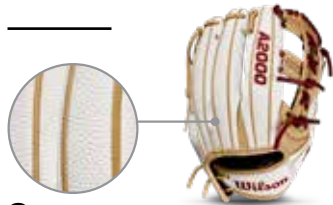

THE PREMIER GLOVE

Since its introduction in 1957, the A2000[®] has evolved with the game year after year. Durable Pro Stock[®] leather offers a consistent feel and allows for a detailed break-in process. Each fastpitch A2000 is tailored to softball with a larger pocket, a female-specific fit and a drawstring wrist closure to enable easy adjustments. Comfort Pro Fit features a Pro Lux[™] leather palm lining that forms to the player's hand over time, making the A2000 feel like an extension of the body. Flat Finger Binding allows players to comfortably take the field with a finger outside the glove for improved control, and the Bold Logo package is built to stand out. The A2000[®] lineup includes patterns with innovations like SuperSkin[™] and Spin Control[®] Technology, ensuring there is an option for every player.

1.

PRO STOCK[®] LEATHER:

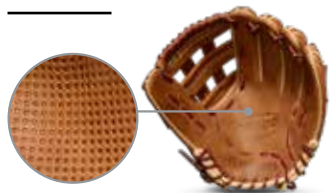

Wilson's iconic Pro Stock[®] leather is preferred for its rugged durability and unmatched feel.

2.

SUPERSKIN[™]:

Twice as strong as traditional Pro Stock[®] leather and only half the weight, giving players the durability they love in a lightweight design.

3.

SPIN CONTROL[®] TECHNOLOGY:

A patented surface texture in Wilson's iconic Pro Stock[®] leather generates friction against the ball on contact, giving players more control.

4.

DRAWSTRING CLOSURE:

Make in-game glove adjustments on the fly and ensure a secure fit on the field with the leather drawstring wrist closure. Pull the rawhide laces into place for a perfect fit.

WOOD BATS

THE DIFFERENCE IS IN THE DETAILS

KNOB MEDALLION

Easy-to-read medallions have been embedded in the knob and indicate the MLB® Prime® grade of wood, species and length, while the bat name is engraved in the surrounding area.

EXOPRO FINISH

The MLB® Prime® lineup features the revolutionary EXOPRO finish that's twice as hard as the previous EXOARMOR®. This innovation in wood bat technology gives you a finish you can feel in an incredibly durable top coat that not only drastically increases surface hardness, but gives you a mirror-like finish in high-gloss models.

SEAMLESS DECALS

Louisville Slugger's exclusive Seamless Decals are applied directly under the top coat, giving MLB® Prime® bats a pristine look. All MLB Prime models feature branding that blends into the bat almost as intricately as the grain of the wood.

CRAFTSMAN-STYLE CUP

Our completely re-engineered Craftsman-Style Cup features a thicker width edge along the end of the barrel, lending added strength and durability to the end of the bat to help reduce chipping and cracking.

30-DAY LIMITED WARRANTY

All MLB® Prime® bats come with a 30-day limited warranty. Restrictions apply. Visit Slugger.com for complete details.

WOOD SPECIES

Louisville Slugger is dedicated to crafting wood bats perfect for each player. We offer several wood species, headlined by Maple and Birch. So no matter how you like your lumber, the team at Louisville Slugger has you covered.

MAPLE

The dominant wood species in Major League Baseball, Maple bats are known for their surface hardness, stiffer feel and unmatched sound.

BIRCH

One of the newer, but fastest growing wood species in Major League Baseball, Birch bats feature a surface hardness close to that of maple but increased flexibility.

SWING WEIGHT SCALE

Everyone talks about the length and weight of their baseball bat. But swing weight might be one of the most impactful ways to classify bats. Swing weight is a determination of how a bat's weight is distributed along its length. More weight toward the end of the barrel means you're swinging an end-loaded bat. These models create more momentum in a player's swing and generate more power and distance. Evenly distributed weight in balanced bats allow for a potentially greater swing speed for many hitters – perfect for players who focus on bat control and increased contact.

NO DOUBT. ALL IN.

Custom Molded Gear
Gel-To-Shell™ products are the only custom-fitted protective gear on the market.

Gel-To-Shell™ Technology
For a true-to-you fit, our form-fitting tech transforms your guard into a custom shield.

Dispersion Technology
Evenly redistributes force across the entire surface of the guard and away from the point of impact to better protect against severe injury than soft, flexible, and ill fitting guards.

SEAMS BASEBALL

DURA-CORE TECHNOLOGY™:

Added to Red Cushioned Cork to help the ball retain hardness. Formed to withstand impact and give you the game-changing performance you need.

RED CUSHIONED CORK:

Gives a Wilson® baseball the ability to keep its shape and firmness, allowing for better pop off the bat.

SUPER SEAM TECHNOLOGY™:

With seams 20% higher than raised seam baseballs, pitchers experience superior control on the mound. Fielders can locate the ball quickly in their gloves and throw with more accuracy.

FLAT SEAMS:

The most aerodynamic Wilson® baseball, these balls fly further, giving both pitchers and hitters a true feel of the ball.

M3X™

CLASS: **OFFENSIVE & DEFENSIVE TRAINING MACHINE**
LEVEL: **PROFESSIONAL**

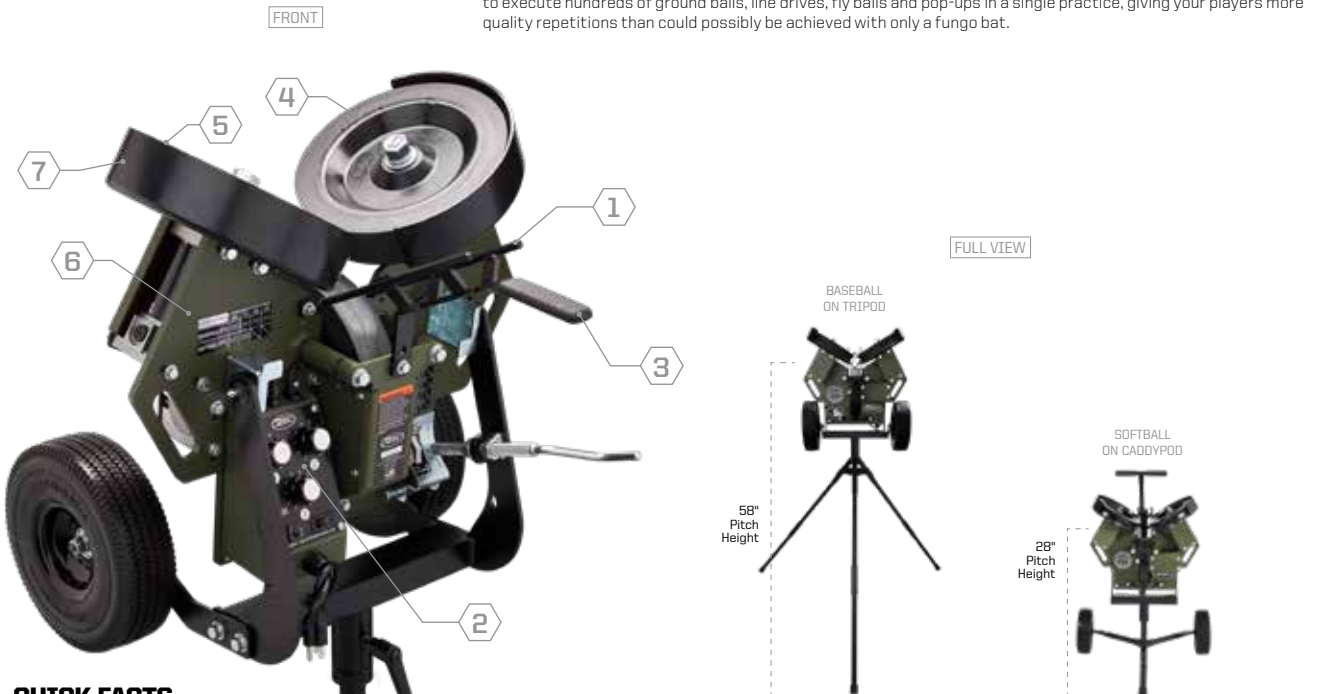

The revolutionary M3X training machine is the first all-in-one crossover pitching machine of its kind. Designed as a smaller, more portable 3-wheel machine, the M3X contains all the power of full-sized 3-wheel machines, while combining the same features of the defensive R-Series machines by ATEC.

The all-in-one M3X crossover machine is also able to be converted to a fastpitch softball machine. By moving the motor placements to the outside settings, the M3X can go from throwing baseballs to softballs in a matter of minutes.

Offensive Pitching: By utilizing three wheels, top speed, accuracy and spin are maximized due to the ball's increased surface contact with the wheels. The M3X is equipped to throw in excess of 90 MPH, giving you the ability to train against Major League-quality fastballs and both right and left-handed breaking balls. Using only the speed control knobs, pitches can easily be dialed-in without making any physical adjustments to the machine, helping you improve the efficiency and effectiveness of your batting practice.

Defensive Training: Combining the functionality of the R-Series machines also give the M3X the ability to swivel 360 degrees, and control elevation from ground balls and fly balls in a split second. This gives the user the ability to execute hundreds of ground balls, line drives, fly balls and pop-ups in a single practice, giving your players more quality repetitions than could possibly be achieved with only a fungo bat.

M1.J™

CLASS: **OFFENSIVE PITCHING MACHINE**
LEVEL: **TRAVEL**

The all new M1.J is the fastball only version of the only version of previous ATEC single-wheel machines. This machine is great for younger age groups and machine pitch leagues, with its lightweight portability and easy setup. With speeds of 30-70 MPH, this will allow the machine user to throw a straight fastball to match any player's abilities. It's built using the same technology, processes and materials as ATEC's other industry leading training machines. Similar to other high-end ATEC® machines, the M1.J is also equipped with a dual-durometer concave wheel. This wheel is engineered to increase the wheel's grip on the ball which maximize both pitch speed and accuracy. The M1.J also features a tilting throwing head, which allows the machine to throw ground balls and fly balls. This machine is the perfect addition for any team looking to improve all areas of their game!
